#	RESPONSES	DATE
1	When is this survey going to end?	3/22/2023 8:05 AM
2	It's insane to ask for public input on such legalese!	3/21/2023 4:20 PM
3	YOU WON'T GET MUCH "COMMUNITY" INPUT IN A SURVEY LIKE THIS !!! Or do you really want any?	3/21/2023 3:57 PM
4	Wow, the Land Use Subcommittee's recommendations are clear and concise! Why can't the SMMP subcommittee's be clear like this?	3/20/2023 4:18 PM
5	Wow, the Land Use Subcommittee's recommendations are clear and concise! Why can't the SMMP subcommittee's be clear like this?	3/20/2023 2:24 PM
6	These recommendations imply that certain regulatory parameters don't already exist.	3/20/2023 9:10 AM
7	If the County wants to "host" a landfill, then they need to do their job. That likely includes establishing a fully funded work unit to do the tasks necessary and as outlined above. Since the waste comes from all over the state, the cost of the work unit could be born by a surcharge on waste dumped or diversion of the host fee to a separate fund established for supervising, reporting, advising and other tasks. If an City or County wanted to "host" a major industrial site known to cause or result in environmental and land use issues, they would establish means of monitoring, regulating and enforcing standards. The County needs to do so. I would like to see an annual "landfill status report" each year similar to the annual water quality report. It would be detailed and thorough and mailed or emailed to all county addresses. The annual report could also include progress made on the SMMP.	3/20/2023 8:43 AM
8	Decisions should be made on facts no opinions	3/17/2023 11:18 AM
9	Requirements for CUP approval should be based on quantifiable and factual information.	3/17/2023 9:49 AM
10	All good. Re CUP #16: would need to determine level of risk prior to paying for establishing a response program.	3/16/2023 10:06 PM
11	Limit infill from outlying counties	3/16/2023 2:40 PM
12	To address public concerns about odor, engage in a dialogue with the community to promptly develop and implement an odor reporting and mitigation plan that is consistent with the community's needs and DEQ requirements and County health and nuisance regulations. I'd love to know the reading level of these items. If I couldn't understand it, I opposed it, generally.	3/16/2023 2:38 PM
